

Specifications

- 45" x 45" x 40"
- 32 ft³ storage capacity
- 3000 lbs. weight capacity
- 6061-T6 aluminum

Features

- Moveable by pallet jack or forklift
- Crane lift points
- Air piston supported lid that opens within the toolbox footprint
- Secure tie-down points
- Lockable

Description

The Systems Integrated ST-1 Toolbox is a purpose-built, go-to-sea toolbox designed specifically to survive harsh saltwater environments. The toolbox provides large volume and weight capacity to accommodate a range of back deck tools and rigging equipment. Designed with ship deck placement in mind, the toolbox features a piston supported lid that opens within the toolbox footprint, allowing the toolbox to fully open when placed flush against a backstop.
